

Project: 3D Campus

For my project, I decided to recreate the part of the SEEU campus where I spend most of my days on.

This includes three of the main buildings that I usually pass by or work in:

- Blue Building (816) - the computer labs building where I have most of my classes.
- White Building - the SEEU Library, one of the most recognizable spots on campus.
- Orange Building - the Career Center, a place for student services.

Now, the 3D scene represents a small but familiar part of the SEEU campus - the area around 816, the library, and the Career Center during these autumn days. It feels more alive and recognizable, combining both the technical elements of Three.js modeling and my personal connection to the place.
